MARKETING DATA PLATFORM

2026.6.1 RELEASE NOTES

Bug Fixes

Automations – Journeys

- Improved performance on Journey transition processing when branches rejoin the main branch. (ZD #42597)
- Updated Additional Fields to include data on all records. Closed accounts in some cases caused missing data in the additional selected fields.

Reporting

- Corrected a syntax expression error that occurred on some reports causing it not to display data. (ZD #42737)
- Fixed the Automation Detail and Summary Report row count totals. Data was not being narrowed down by Action causing the counts to be overstated. (ZD #43176)
- Corrected an issue that could prevent the Pieces Mailed for the Campaign Tracking Report to reflect all campaigns received on some ExecuTrax Trigger Matrices. (ZD #42845)

ETL

- Fixed a deadlock issue that could cause the ETL to not complete. (ZD #42415)
- Corrected a 515 error that occurred during the Individual Service Update. (ZD #42693)

Version Check

Ever wonder what version you are on? Simply click the SUPPORT link at the top right corner of the page. If it doesn't match the screenshot below, please contact Marquis Support or your Client Relationship Manager.
