

EXECUTRAX

SQL 11.17.1245 AND 11.12.1246 RELEASE NOTES

Enhancements & Modifications

New CASS Files

New address standardization files are now available. This upgrade will automatically add the new files. We recommend going to **File – CASS** selecting **All** under **Process** and **Continue** to get all your addresses updated with the new address deck.

Updated ExecuTrax Version

This upgrade extends your ExecuTrax version to 9/15/2027. We may release additional upgrades to ExecuTrax throughout the year. If so, you will be alerted when they are available both within ExecuTrax and on the Daily Update Results emails.

Bug Fixes

Reports

Fixed a bug that caused the Total number of Customers on the Cumulative Distribution report to be overstated. Only an issue with the Customer level report. (ZD #40514)
